SUMMARY

Software engineer with a strong interest in computer science, distributed systems. Primary language is Java, with hands-on experience building backend services and microservices in production environments. Enjoy exploring open-source projects, learning how systems are designed, and quickly adapting to new languages and technologies.

EXPERIENCE

• Techcombank

July 2024 – Jun 2026

CDB : A digital banking platform for enterprises

- Technologies : Microservices , Spring Framework, AWS, Containerized enviroment, CI/CD
- Responsibilities:
 - Contributed to the upgrade of Backbase Digital banking platform from 2023.09.LTS (Java 17) to 2025.09.LTS (Java 21) :
 - Worked closely with the platform engineering teams to upgrade application dependencies, SDK versions.
 - Analyzed breaking changes, deprecated features, and configuration updates, to ensure compatibility and stability across microservices.
 - Collaborated with feature teams to deliver enterprise digital banking capabilities across onboarding, payments, billing : online e-banking administration, payment-related workflows, access control integration system,...

• Giaohangtietkiem

Jul 2022 – Jun 2024

Xteam : Provided a service guaranteeing the pick-up and delivery of orders within 3 hours, applicable to local orders (Ha Noi and Ho Chi Minh City)

- Technologies : Java 11, Spring Boot, Mysql, MongoDB, Redis, Kafka
- Team size : 20
- Responsibilities:
 - Acted as a key member of the team, managed the Order Holding and Order Release services.
 - Integrated with GHTK-ID (a centralized authentication system) to implement authentication mechanisms for all internal and external APIs.
 - Researched and applied new techniques, such as design patterns (template method, factory, filter pattern,...), and utilized Redis for handling locking, data races, delay tasks, and batch processing.
 - Planned tasks and performed code reviews for team members.
 - Monitored production systems, handle incidents and delivered bug fixes.
 - Worked closely with BA team and backend team members to clarify requirements.

• TPBank

May 2021 – Jun 2022

Intern Backend Developer

- Developed and maintained application based on requirements.

TECHNICAL SKILLS

- **Programing languages & Frameworks** : Java, Spring boot, Microserivces
- **Data integration systems** : Mysql, Redis, Kafka
- **Others** : TOEIC (865)

EDUCATION

• Posts and Telecommunications Institute of Technology

Aug 2016 - Mar 2021

Multimedia application development; GPA: 3.0/4
